

RECENT EVENTS PROTOCOL

- 1. Use the standard protocol with image of worst moment up to, but not including, the body scan.**
- 2. Run sequential movie, processing each disturbance as it arises (*without* redoing the entire setup)-What kind of disturbance?“, “0 – 10?“, ”Go with that!“**
- 3. Continue until client can run movie from start to finish with no disturbance, SUDs = 0.**
- 4. Run movie a second time using EMs to get no disturbance twice (SUDS = 0)**
- 5. Run movie with PC, get VOC=7 twice, first time without EMs, second time with EMs.**
- 6. Body scan with movie and PC (no EMs)**
